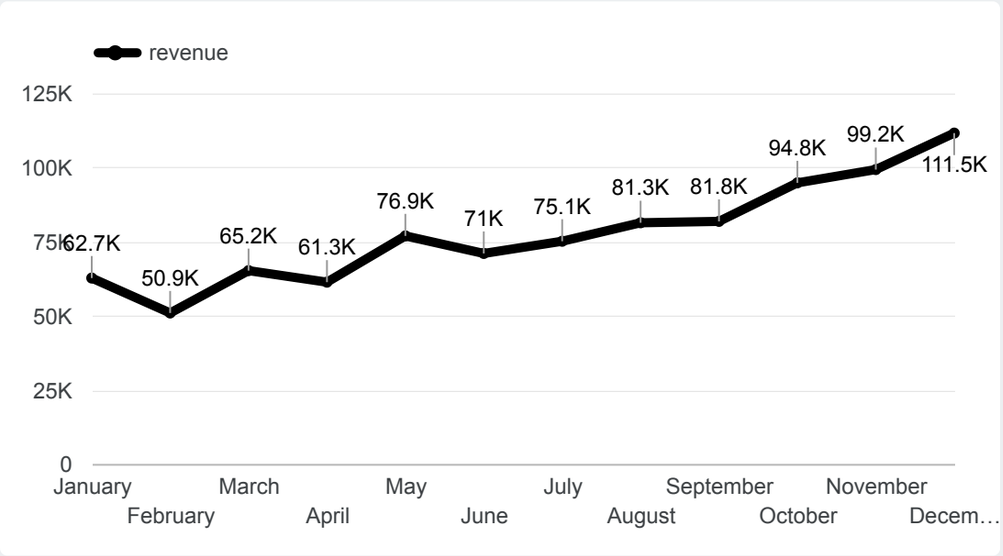
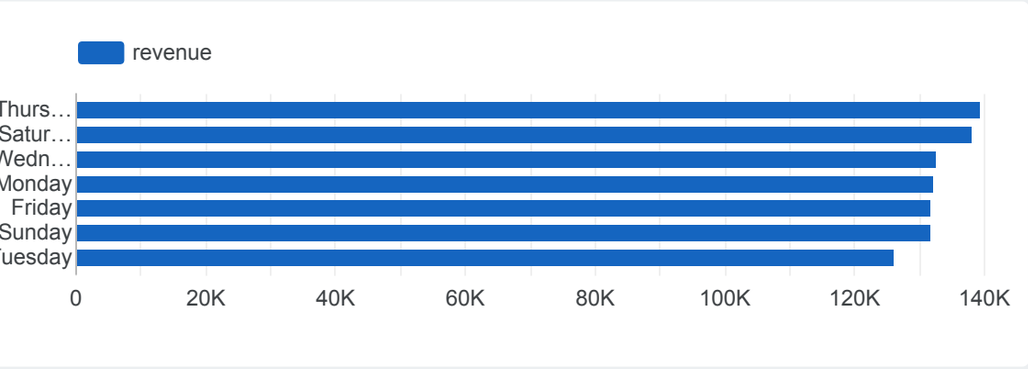
Total Orders

19.6K

Monthly Revenue(2025)



Daily Order Trend



KEY INSIGHTS

Revenue Growth

- Revenue doubled from $60K (Jan) to $120K (Dec)
- 100% YoY growth - Q4 shows strongest performance with consistent $90K+ monthly revenue

September shows a minor revenue dip to $77K before strong Q4 recovery — possible seasonal pattern worth monitoring.

Peak Sales Days

- Wednesday generates highest revenue ($140K total)
- Weekend sales (Sat/Sun) underperform weekdays

Geographic Concentration

- Revenue spans 3 continents with North America and Asia as primary markets

Customer Behavior

- Average order value stable at $83.92

Strategic Actions.

Recommendation 1: Increase ad spend and inventory levels starting in October to capitalize on the 100% YoY growth trend leading into the Q4 peak (December). **Recommendation 2:** Schedule "Flash Sales" or major email marketing blasts for Tuesdays and Wednesdays, as these are your highest revenue-generating days. **Recommendation 3**: Allocate localized marketing budgets to Guangdong and England, as these regions are driving the highest global revenue distribution.
